LAB 3 -- Symbol Table Tools

Due Feb 10 by 11:59pm   **Points** 20   **Submitting** a file upload   **File Types** pdf

This assignment deals with working with a symbol table. The code **HERE** ⤢ is from the web site **http://forgetcode.com/C/101-Symbol-table** ⤢ **(http://forgetcode.com/C/101-Symbol-table)** .   -- Make sure you get this running and understand it. You will be using this on your next assignment.

Your task is the following:

0) Your name, the date, a one line description of this assignment

1) Properly indent, and comment the code,. The header of your code should be a description of the code, where it was pulled from and changes you made.

2) Demonstrate that you understand the code by testing the functionality of the interface. A screen shot of at least 4 actions is required

3) Describe the main data structure in this code. What is it's name? What are the fields and how is the structure built

4) What does "malloc()" do? Why do we use malloc()?
